

Greetings,

Last July I had a chat with a customer and we got into a discussion about "cryptocurrency." aka: e-Currency, Digital Currency, and surely you have heard of BitCoin...Don't blow this off and keep reading, because this could truly change your circumstances...

What I have learned over the last year is that Cryptocurrency is a new way to Freedom and worldwide connection without establishment barriers due to the revolutionary "BlockChain."

So for the last year I have been working on, learning about, studying why there are 15,000 people joining daily world wide the cryptocurrency movement. It is because they get it. It is about creating community, getting clear on your intentions, breaking free from the constraints of artificial barriers that separate us needlessly. Very similar to how the Bio-Mat ends needless suffering. There are few barriers that the Bio-Mat cannot address. (www.bio-mats.com) . We created a website dedicated to these device so that a larger audience could learn about them....

When we first connected with the Bio-Mat it was like this e-Currency thing. There was a whole new language to learn about it so that we could communicate clearly to others who have no idea how this Bio-Mat can be so magnificent in how it can alleviate needless suffering.

We were looking for something to help others achieve a greater state of health and we did not know the Bio-Mat existed. It just showed up in our life and we chose to learn about it's efficacy. As we understood their magnificence we were able to articulate better and better as we

became involved and studied and shared. It is the same with the Digital Currency revolution. It has a language that must be studied to understand how it works so magnificently to alleviate another type of needless suffering. Most needless suffering is caused by humans. Solutions to needless suffering can be created by humans. I think I can now sufficiently articulate the magnificence of the Digital Currency revolution, because I now understand the "BlockChain." See: www.bitmore.cash - video 13 & 14

I have struggled to understand why there is such a barrier of resistance to grasp the concept of the Digital Currency revolution. After all only 6% of the world population participate. Remember Microsoft, Blockbuster, Apple Computers, DVD and CD players. Where is Blockbuster now? Do you know that Netflix has more subscribers than Cable TV? Netflix figured out how to get television programming to customers with a large variety of programs at very low cost. I wonder how long HBO, Showtime, Starz, Cinemax, etc will last. They are running 20 yr old movies. Well they would be new to the younger folks.

We now have an android box that streams, Music, Movies, TV Shows, Live TV and more at no cost. It constantly updates the software. We watched The Circle, Life, The Mummy, Beauty and the Beast, Alien Covenant, Power Rangers, The Shack in the last month for \$0.00. At a Movie Theater that would have been over \$200.00. I think we paid around \$350.00 for this box 3 years ago. We found it in Canada. Now those boxes are here in the USA.

Last December as vendors with the Bio-Mats at "The Worlds Largest Christmas Bazaar," across the

aisle was a vendor with about 5 people attempting to sell these boxes. They were experiencing a lot of resistance. People would not even stop to see what these Boxes could do. So they missed out on saving a lot of \$\$ on their entertainment viewing. The 5 people were very frustrated. So I had a chat with them. Those boxes will devastate the entertainment industry just like Netflix did to Blockbuster if the established Movie Channels can't grasp the new trends that are arising for delivering entertainment.

I have experienced similar resistance to people not allowing themselves to simply take the time to grasp the The Digital Currency, e-Currency, Cryptocurrency Revolution...whatever you choose to call it - is scheduled to become a 5 Trillion \$\$ industry in the next 7 years. Where will you be in the next 6 months? If you knew that Netflix would take over with their streaming technology, would you have invested in Netflix or how about those android boxes? It is now 7 months since that Christmas Bazaar and I am seeing them advertised on many different internet venues. Again I ask where will you be in 6 months? The tech revolution is moving on with or without you. I knew those boxes would take off once people caught the vision of how much they could \$ave on entertainment. What if you could become involved for Free at absolutely not cost to you, to get in on the "next Big Thing"? I found it, and I am letting you know about it now, today.

FYI: I have become involved with 3 different cryptocurrencies. This last February a company with a different type of vision on the Digital Currency revolution was overwhelmed with around 25,000 new participants. So they have been playing catchup for the last 5 months. They have delivered absolutely everything they claimed they would deliver. On Friday and Saturday July 7&8 they live streamed their first conference. I gotta say it was quite good for their first try. There were about 200 of us live watching and not once did the stream fail. That is remarkable for a first try. That is just an example of how well they are accomplishing their goals.

They have created a simple solution to the Digital Currency resistance that I encounter. There are 3ish ways to participate:

1) Join their network, which provides education modules and receive back like a cash rebate the full amount in e-Currency back on the package that you chose. Right now you receive the e-Currency back at 7 cents and they are worth 20 cents on the exchange. That means you get more coins back at nearly 3 times the amount as you would if you purchased on the exchange. Example: \$100 = 1428 coins x 20 - \$285.00. You just made \$185.00 instantly. I got in at 4 cents, trading at 20 cents currently – that means the value of the cash I put in is now worth over 4 x's what I put in. 7 cents is still a great value. See what I mean, this company delivers...The 7 cents rebate is good through the end of July.

2) You can create a network and receive rewards for those who join.

3) You can learn about mining Digital Currency. Yes, just like minerals (gold, silver, etc.) eCurrencies are mined and you can invest in the "mine" instead of purchasing gold, etc, and you can do the same for very little \$\$ and mine the Digital Currency. This is actually implemented not by the company because they do not own the e-Currency, offered by participants who like to do this and they offer the information freely. These people are an awesome team. I feel like I have been keeping a great secret by withholding this information. I just had to wait until I figured out the compelling reason to participate,

which took me time to study and understand their vision. Yes, you need to grasp their vision if you want to help others thrive in this industry. You do not need to do anything at all except for #4...

4) This is the most brilliant part of their plan and which I have determined would be the easiest to grasp. Just download the App and start shopping at over 4500 retailers. And guess what, instead of a cash rebate (cash never increases in value) you receive e-Currency as a rebate. Since this e-Currency is still in the infant stage it will only go up in value and you don't have to do anything about it, unless you choose to learn more..

This app allows you to find the closest retailer to where you are at the moment. You could be searching while in your car and if you have the GPS location active on your smartphone, the app will provide the retailers location. You can also get the barcode app and the Shopping app will locate the best deal on that item from the bar code. How can that not be the best thing ever for convenience, saving you time and \$\$ and receive rewards of the eCurrency that costs you nothing and will only go up in value?

This application makes the eCurrency understandable because it is use able. It took BitCoin 4 years before it could be used in the real world. This eCurrency is functional in the real world now! Get this Free app now and see how easy it is to use and save \$\$ and receive eCurrency rewards. You also receive a free account with the network, so you can poke around, kick the tires, etc. So you get 3 Free rewards without paying anything! 1) Free Reward App, 2) Free e-currency rebate & 3) Free Account. What is not to like about that?

I have attached a document that provides some information for the curious. You can watch the video or not. If you do nothing else get the Free App:
